SUMMARY

- AI/software engineer with 5 YOE building product and infra @Meta and early-stage startups.
- Proven record in 0-1 product dev&growth, Ads systems and AI agent infrastructure.

WORK EXPERIENCE

Founding Engineer at Sylph AI, San Francisco, CA **Jan 2026 - Now**

- Founding engineer building **AdaL**, a self-evolving coding agent spanning terminal, web, and cloud, taking the product from **0-1** and supporting hyper-growth ARR.
- Developed AdaL's core agent runtime and harness, achieving **SOTA performance** on **SWE-bench** and **Terminal-Bench 2.0**, outperforming Claude Code and Codex.
- Built evaluation infra covering agent performance, throughput, concurrency, token efficiency and benchmark automation. Established staging environments and e2e testing pipelines that significantly improved iteration velocity and release quality.
- Designed model-agnostic inference infra, including prompt caching, tool-output caching, custom tool-call protocols, and sub-agent workflows to reduce latency and inference cost.
- Architected the LLM proxy system with authentication, billing, subscription management, rate limiting, and token accounting to support high-throughput enterprise workloads.
- Unified the agent runtime with the LLM proxy system to host **40+ frontier models across 10+ providers**, and built the AdaL SDK and customized agent platform for long-running tasks.
- Proposed and co-authored THE LAST HARNESS YOU'LL EVER BUILD, introducing a self-evolving harness architecture.

Software Engineer at Meta Platforms, Inc. Seattle, WA **Mar 2022 - May 2025**

- Led the business-oriented products including Shop Ads($2B ARR), Click-to-WhatsApp($3B ARR) Messaging Ads and Meta CRM system.
- Resolved CTWA Ads product growth bottlenecks by enabling advertisers to use Multi-WhatsApp numbers for ad campaigns. Addressed business needs for 2M+ advertisers, and resulted in significant improvement on ads adoption(0.006% Meta iRev).
- Owned e2e responsibility for data-driven product roadmapping and business impact metrics measurement, A/B testing analysis, and delivering presentations to stakeholders.

Co-Founder at Stealth Startup - Gaze track iOS App [Demo][AppStore] **Mar 2025 - Aug-2025**

- Designed and launched an iOS product leveraging **ARKit** and **RealityKit** to deliver real time gaze tracking on mobile devices, providing the first high-accuracy, low-cost solution in the market.

EDUCATION

- University of Southern California (USC), US. M.S. Computer Science **2021**
- Beijing Jiaotong University (BJTU), China. B.E. Mechatronics Engineering **2019**

SKILLS

- TypeScript, Python, React.js, Node.js, SQL, AI Agent, AWS, Docker, Web&iOS
